

Artwork Care Guide

Paint on Canvas

Thank you for your purchase!

Whilst I make my artworks built to last by using high quality materials, artworks are still delicate and need to be treated with love to keep them looking their best. Please follow this guide to ensure your artwork remains in perfect condition.

Please avoid placing your artwork in direct sunlight, prolonged exposure to UV light can fade and damage your art.

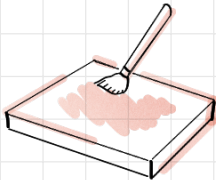

Please do not expose your artwork to extreme temperatures or moisture. Heat and humidity can discolour the varnish or make it cloudy.

When handling your artwork please ensure your hands are clean and dry. In rare cases, skin oils and moisture can transfer onto the canvas and leave behind permanent stains.

When displaying or storing your artwork please keep it in a dry location, damp environments can lead to mould forming on the back of the canvas.

If you need to clean your artwork, please lightly wipe it with a Very soft brush or cloth.

Please feel free to contact me if you have any questions or concerns.
I hope you enjoy your artwork! - Alex ♥
